# INFORMATION

## Information bureau

Visitors may apply to the information bureau on the first floor of Roberts Hall for mail and information. Lost and found articles should be reported here.

## Registration

Visitors are requested to register in Roberts Hall or Martha Van Rensselaer Hall and to procure a program. Former students should indicate that fact on the registration card and should give their occupation.

Mr. A. W. Gibson, of the Office of Resident Instruction, is collecting information on former students of the College, and will be glad to assist them in getting information about their classmates and acquaintances.

## Conferences and exhibits

For special conferences, see page 22.

For description of exhibits, see page 26.

## Lecture rooms and laboratories

The rooms of the buildings of the Colleges of Agriculture and Home Economics are numbered independently. All rooms on the first floor bear numbers in the first hundred, those on the second floor in the second hundred, and so on. The location of demonstrations and lectures is indicated by giving the name of the building and the number of the room; thus, Rice Hall 300 is a lecture room on the third floor of Rice Hall.

## Checking room

Coats and parcels may be checked free of charge on the second floor of Roberts Hall and in room 124, Martha Van Rensselaer Hall.

## Rooms

A directory of available rooms is in Roberts Hall, third floor. Plans have been made to insure comfortable accommodations for all visitors.

## Meals

### Cafeteria—Martha Van Rensselaer Hall

**EXHIBITS**

**Agricultural Economics.** All exhibits in Warren Hall.

*Farm Records and Accounts:* Factors contributing to the success of an individual farm business. A different farm business is analyzed each day and there is a guessing contest of the labor income of that business. The farm business is discussed and an announcement of the results of the contest is made at 4 p.m. Room 101.

Farm-account records and account books commonly used. They aid in making income-tax returns. Room 101.

*Containers and Packages for Wartime:* With burlap scarce, tin limited, and wooden containers curtailed, many farm products are marked in new types of

containers. Some of these are on display, together with costs and sizes. Room 140.

**Agricultural Engineering.** All exhibits, unless otherwise indicated, in the Agricultural Engineering Laboratory. Staff members will discuss individual problems.

*Electricity:* Properly installed electric wiring for lighting fixtures, switches, and outlets for connecting appliances.

*Homemade electrical equipment:* Also types of fractional horse-power motors used on farms.

*Farm-water-supply systems:* Deep- and shallow-well pumps and automatic water-supply systems, including the deep-well "jet" pump.

*Plumbing system:* A complete automatic water system for kitchen and bathroom. A simple low-cost gravity water system using a water front in the kitchen range.

*Concrete products:* Materials, types of products, waterproofing, and testing sand.

*Farm shop:* Equipment farmers find profitable to own, arranged for a practical farm shop.

*Farm machinery:* Tractors, and farm-machinery adjustment, repair problems, and electric welding.

*Horseshoeing:* Mr. Layton will be in the Farm Practice Shop daily from 8 a.m. to 12 m. to discuss horseshoeing.

**Agronomy.** Room 143, Caldwell Hall.

An exhibit largely of war-emergency bulletins and concerned principally with the shortages of nitrogen, legume seed, labor, and special soil problems.

**Animal Husbandry**

*Dairy cattle:* Visitors are welcome at the dairy barns at all times. After 4 p.m. each day members of the staff will answer questions.

*Beef cattle:* Visitors are welcome at the beef barn at all times.

*Horses:* Visitors are welcome to the horse barn at all times.

*Sheep and swine:* Sheep and swine barns are open to visitors. Trips to the sheep barns are arranged for Wednesday at 3 and 4 p.m.; to the swine barns on Thursday at 4 p.m. Transportation will be provided from Wing Hall.

*Meat and meat products:* Cuts to show quality and methods of preparation, daily from 4 to 5 p.m., in the Meat Cutting Rooms, basement, Wing Hall.

**Correspondence courses.** The office of farm-study courses is in the basement of Roberts Hall. These courses are for farmers, poultrymen, dairymen, fruit growers, vegetable gardeners, beekeepers, and others. Those who are taking, or have taken, or expect to take any of the various courses offered, may interview the supervisor from 10 a.m. to 12 m. daily.

**Dairy Industry.** A number of the more commonly-used milking machines. Market Milk Laboratory, Dairy Industry Building, from 9 a.m. to 5 p.m. Questions will be welcomed.

**Entomology.** Room 245, Comstock Hall.

*Household-insect pests:* How to recognize and control various insect pests of stored food and of clothing in the household.

*Insects and diseases:* Parasites and insects that transmit diseases of man, domestic animals, and game animals. Of special interest to persons entering

the armed forces for service abroad. Insects and arthropods that serve as transmitters of tropical diseases.

*Stored-grain pests:* Living specimens of granary weevils, rice weevils, flour beetles, saw-toothed grain beetles, foreign grain beetles, meal worms, and others. Models show methods of fumigating for weevil control. Demonstrations of fumigants. Models of bin construction.

*Victory-garden pests:* Insect pests of vegetables. Charts, photographs, specimens, and living material. Control measures available in view of the insecticide shortages. Dusting and spraying equipment.

*Entomological books of current interest:* Books on insect pests of the garden, orchard, household, stored fabrics, stored food, and the like.

**Forestry.** How to select, measure, and harvest forest products is shown on daily field trips at 1 p.m. (see program). No wood-chopping contest. The Forestry Museum is open each day. Personal conferences with staff members not occupied with lectures and field trips.

**Home Economics.** Many exhibits of interest and value to every homemaker have been prepared by the several departments of the College of Home Economics. These are in Martha Van Rensselaer Hall. These exhibits are as follows: *Ground floor:* Homemade play materials for young children, Room G-18; soap suds and softeners, Room G-19; Mrs. Careful and Mrs. Careless and their work centers, Room G-19; long life for equipment, Room G-20; and nursery school in session for observation, Room G-29. *First floor:* Book exhibit, Room 117; and home play in wartime, Room 120. *Second floor:* Mending and repairing clothes, Room 213; the old and the new, wedding gowns, maternity dresses, and baby clothes, Room 216; the care and adjustment of sewing machines, Room 226; new clothes from old, clothes made by students, conservation suggestions from the 4-H Clubs, putting a new lining in an old coat, work clothes, Room 234; and health and safety posters, Room 278. *Third floor:* Books and pamphlets on foods and nutrition, Room 301; how safe is your home, Room 317; old and inexpensive material used for accessories in the home, Room 318; the homemaker, her own handy man for the duration, Room 327; dehydrated foods, Room 343; weight control, Room 353; and let's save fats, Room 360. *Fourth floor:* Combining the old and the new in homes for present-day family living, Room 401; the house that can "take it," one of its rooms, Room 401; and enlist your extra room in the war effort, Room 408.

**Plant Breeding.** Open from 9 a.m. to 5 p.m. daily. Members of the staff will demonstrate and answer questions.

*Hybrid corn and soybeans:* Room 49. Corn for silage and grain, and soybeans for grain, silage, and hay. Vegetable types of soybeans.

*Grain crops:* Room 146. Information regarding varieties best adapted to New York farms and where seed of these may be obtained. Wheat, oats, barley, rye, soybeans, open-pollinated corn. New strains of potatoes, cabbage, cucumbers, and celery; also growers' samples of certified seed.

**Pomology.** Plant Science 107.

This exhibit, set up largely by the students, shows apple varieties and red-bud sports grown in New York and other leading fruit sections of the United States. New varieties on exhibit are supplied by the Experiment Station at Geneva. Several of these were bred, named, and introduced by the Station. Varieties adapted to various sections and new varieties compared with standard leading and commercial sorts.

**Potato Show.** The combined potato exhibit by all departments working with potatoes is in Plant Science 341 and 343. Come and discuss your potato problems here.

*Varieties:* New seedlings, new varieties, and standard varieties as they grew in the field. Also plates of new and standard varieties, old varieties no longer commercially grown, and foreign varieties. The common defects of potato tubers are exhibited.

*Insect pests:* Illustrations, charts, and living specimens show insects that destroy potato foliage, transmit virus diseases, and injure tubers.

*Potato diseases:* Blight-immune seedlings developed at Cornell, tubers of scab-susceptible and scab-resistant varieties and seedlings, charts showing the importance of daisies in the spread of yellow dwarf and purple top wilt of potatoes. Rotations and the use of fertilizers, manures, and cover crops in the control of rhizoctonia disease of potatoes.

*Grading:* The State Department of Agriculture and Markets shows changes in the U. S. No. 1 standards for potatoes.

*Food value:* The College of Home Economics shows the effect of methods of preparation and cooking on the iron content in potatoes.

Departments cooperating are Entomology, Plant Breeding, Plant Pathology, and Vegetable Crops.

**Poultry.** All exhibits are in Room 100, first floor, Rice Hall.

*Culling:* How to select hens likely to be profitable and to cull those that should be sent to market.

*Nutrition:* Wartime poultry rations; showing how present scarcities can be met by substituting available ingredients.

*Egg and poultry production for the war:* Egg production in 1941-42, with goals for 1943. Statistics on dried eggs. Dressed fowl under refrigeration to demonstrate the federal dressed-poultry grades. Also, cut-up broilers.

*Homemade equipment:* Labor-saving devices and chick brooding used in the production of broilers and other meat birds.

*Development of the chick:* Living embryos at various stages of incubation.

*Rearing healthy pullets:* Charts and models showing the value of growing healthy pullets and the improved methods of rearing.

*Production of chicks:* Demonstration of important factors in economic production of good chicks.

**Publication.** Third floor of Roberts Hall; the work of the office that edits bulletins, issues news items, teaches journalism, carries on an extension service to the rural press, conducts correspondence courses, plans and installs exhibits, and prepares illustrations, and other art work.

**Rural Education.** Open daily from 9 a.m. to 5 p.m. in Stone Hall, Room 101.

Wartime activities and programs in secondary schools during 1941 and 1942. Topics described are:

High-school victory corps; victory gardens; nutrition; clothing; home nursing; first aid; health and physical education; recreation; school camps; rural war-production training programs; farm-labor supply; scrap metal and rubber; defense bonds, stamps, and war chest; mathematics and science courses; social-studies courses; junior aviation high-school course; out-of-school youth units.

**Vegetable Crops.** Personal conferences with members of the department at their offices in East Roberts Hall each day from 9 to 10 a.m. and from 3 to 5 p.m. when not on the program.

**Victory Gardening.** A combined exhibit in which six departments present a complete display of interest to gardeners. Plant Science, Room 15.
